QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor

R. C. SUTCLIFFE

Vol. **99**, 1973

ROYAL METEOROLOGICAL SOCIETY
CROMWELL HOUSE, HIGH STREET, BRACKNELL, BERKS.
1973

CONTENTS OF VOLUME 99

PAG

EDITORIAL .. ..

A. GILCHRIST, G. A. CORBY and R. L. NEWSON—A numerical experiment using a general circulation model of the atmosphere .. ..

J. R. GARRATT—Studies of turbulence in the surface layer over water (Lough Neagh). III. Wave and drag properties of the sea-surface in conditions of limited fetch .. 3

D. E. PARKER—On the variance spectra and spatial coherences of equatorial winds .. 4

N. A. STRETEN and A. J. TROUP—A synoptic climatology of satellite observed cloud vortices over the Southern Hemisphere 5

G. V. GROVES—Zonal wind quasi-biennial oscillations at 25-60 km altitude, 1962-1969 7

J. WARNER—Spectra of the temperature and humidity fluctuations in the marine boundary layer 8

Z. WARHAFT—The relation between temperature and humidity in the free atmosphere under conditions of stable stratification and strong thermal intermittency – a case study 8

C. WARNER, J. H. RENICK, M. W. BALSHAW and R. H. DOUGLAS—Stereo photogrammetry of cumulonimbus clouds 10

D. E. PARKER—Equatorial Kelvin waves at 100 millibars.. 11

G. D. HESS and R. H. CLARKE—Time spectra and cross-spectra of kinetic energy in the planetary boundary layer 13

J. B. STEWART and A. S. THOM—Energy budgets in pine forest 15

D. J. CARSON and F. B. SMITH—The Leipzig wind profile and the boundary layer wind-stress relationship 17

A. K. BETTS—Non-precipitating cumulus convection and its parameterization .. 17

Shorter Contribution—

L. L. SCHULMAN—On the summer hemisphere Hadley cell 19

Correspondence—

H. F. EDEN—Comments on the paper by H. A. Douglas, R. Hide and P. J. Mason 'An investigation of the structure of baroclinic waves using three-level streak photography'. Reply by R. Hide and P. J. Mason 20

Discussion—

A. S. THOM—Momentum absorption by vegetation (*Q.J.*, **97**, p. 414) 20

Proceedings at meetings of the Society 20

Reviews—

Atmospheric transport processes. Part 2. *Chemical tracers*, Part 3. *Hydrodynamic tracers*, E. R. Reiter (R.J.M.);*An introduction to the ionosphere and magnetosphere*, J. A. Ratcliffe (R.H.); *Review of Proceedings of Royal Aeronautical Society International Conference on Atmospheric Turbulence* (F.P.); *Meteorology and climatology for sixth forms and beyond*, E. S. Gates (R. C. Sutcliffe); *Climate, present, past and future*, Vol. 1. *Fundamentals and climate now*, H. H. Lamb (R. C. Sutcliffe); *Clouds of the world, a complete colour encyclopedia*, R. S. Scorer (K. A. Browning) 20

Obituary Notice 21

Corrigenda 21

A. Browning, M. E. Hardman, T. W. Harrold and C. W. Pardoe—The structure of rainbands within a mid-latitude depression 215

W. Harrold—Mechanisms influencing the distribution of precipitation within baroclinic disturbances 232

R. Jonas and R. C. Tabony—Precipitation growth at a cold front 252

R. Brazier-Smith, S. G. Jennings and J. Latham—Raindrop interactions and rainfall rates within clouds 260

R. Saha and S. N. Bavadekar—Water vapour budget and precipitation over the Arabian Sea during the northern summer 273

R. Hardy, R. J. Reed and G. K. Mather—Observation of Kelvin-Helmholtz billows and their mesoscale environment by radar, instrumented aircraft, and a dense radiosonde network 279

R. Nagaraja Rao, T. Takashima and R. B. Toolin—Measurements and interpretation of the polarization of radiation emerging from the atmosphere at an altitude of 28 km over south-western New Mexico (USA) 294

. Temperton—Some experiments in dynamic initialization for a simple primitive equation model 303

. C. Davies—Bounds upon the growth rate of errors in quasi-nondivergent prediction models 320

. L. Petersen and P. A. Taylor—Some comparisons between observed wind profiles at Risø and theoretical predictions for flow over inhomogeneous terrain .. 329

. S. H. Rarity—The wave patterns produced by a moving body in a compressible, density-stratified fluid 337

. E. Hunt—Radiative properties of terrestrial clouds at visible and infra-red thermal window wavelengths 346

W. O. Pruitt, D. L. Morgan and F. J. Lourence—Momentum and mass transfers in the surface boundary layer 370

Correspondence—

G. M. Morgan Jr. and G. Langer—Ice nuclei from electrical discharges 387

O. Buser and A. N. Aufdermaur—The density of rime on cylinders 388

E. L. Deacon—The wind profile under low-u_* conditions 391

C. S. Ramage and T. Murakami—Comment on the paper by P. R. Rowntree: 'The influence of tropical east Pacific Ocean temperatures on the atmosphere': Reply by P. R. Rowntree 393

I. Paluch—Electrification by collisions between hail pellets and cloud particles: Reply by B. J. Mason 395

Proceedings at meetings of the Society 401

Reviews—

Annual report on the Meteorological Office 1971, (JRM); *Atmospheres*, R. M. Goody and J. C. G. Walker (R. C. Sutcliffe); *Global stratospheric analyses from the Oxford-Heriot-Watt selective chopper radiometer (SCR) on Nimbus* 4, (PAS) 404

Obituary Notice 406

R. P. Pearce—Present and future trends in dynamical meteorology—Presidential Address 407

A. B. Pittock—Global meridional interactions in stratosphere and troposphere .. 424

D. N. Axford—On an observation of turbulent waves on the tropopause surface .. 438

PAGE

D. J. CARSON—The development of a dry inversion-capped convectively unstable boundary layer 450

J. PADRO—A spectral model for Cisk-barotropic energy sources for tropical waves .. 468

R. N. KULKARNI—Ozone trend and haze scattering 480

A. C. L. LEE—A study of the continuum absorption within the 8-13 μm atmospheric window 490

J. NAMIAS—Hurricane Agnes— an event shaped by large-scale air-sea systems generated during antecedent months 506

G. B. TUCKER—Vertical velocities and vertical eddy fluxes derived from serial soundings at one station 520

R. L. PITTER and H. R. PRUPPACHER—A wind tunnel investigation of freezing of small water drops falling at terminal velocity in air 540

K. R. SAHA—Global distribution of double cloud bands over tropical oceans 551

J. R. D. FRANCIS—Rain, runoff and rivers—Symons Lecture 556

Discussion Meeting, 17 January 1973 on 'Hydrological prediction and forecasting' .. 569

Correspondence—

B. J. HOSKINS—Comments on ' The possible use of Laguerre polynomials for representing the vertical structure of numerical models of the atmosphere ' by P. E. Francis. Reply by P. E. FRANCIS 571

B. N. DESAI—The dry line of northern India and its role in cumulonimbus convection Reply by K. J. WESTON 572

Discussion—

P. R. ROWNTREE—The influence of tropical east Pacific Ocean temperatures on the atmosphere (*Q.J.*, **98**, pp. 290-321) 575

Report of the Council for 1972 576

Proceedings at meetings of the Society 590

Reviews—

Meteorological challenges—A history, Ed. D. P. McIntyre (R.C.S.); *Interpreting the weather. A practical guide for householders, gardeners, motorists and sportsmen*, Ingrid Holford (R.C.S.); *Survey of instruments for micrometeorology*, J. L. Monteith (J.S.G.McC.); *Astronomical photography at the telescope*, T. Rackham (H.J.); *Times of feast and times of famine. A history of climate since the year 1000*, E. Le Roy Ladurie (R.C.S.) 593

Obituary Notices 595

Corrigendum 597

G. M. B. DOBSON—The laminated structure of the ozone in the atmosphere .. 599

K. A. BROWNING, G. W. BRYANT, J. R. STARR and D. N. AXFORD—Air motion within Kelvin-Helmholtz billows determined from simultaneous Doppler radar and aircraft measurements.. 608

K. A. BROWNING and C. W. PARDOE—Structure of low-level jet streams ahead of mid-latitude cold fronts 615

J. N. CARRAS and W. C. MACKLIN—The shedding of accreted water during hailstone growth 639

R. A. R. TRICKER—A simple theory of certain heliacal and anthelic halo arcs. The long hexagonal ice prism as a kaleidoscope 649

PAGE

J. M. Aanensen—The use of Nimbus 4 radiance and radio-sonde data in the construction of stratospheric contour charts 657

K. Cox—Infra-red heating calculations with a water vapour pressure broadened continuum 669

R. Garratt and B. B. Hicks—Momentum, heat and water vapour transfer to and from natural and artificial surfaces 680

R. Robinson, A. Tomasin and A. Artegiani—Flooding of Venice: Phenomenology and prediction of the Adriatic storm surge 688

F. T. Smith—A note on the relationship between large scale energy functions and characteristics of climate 693

R. Brazier-Smith, S. G. Jennings and J. Latham—The influence of evaporation and drop-interactions on a rainshaft 704

J. Hoskins—Stability of the Rossby-Haurwitz wave 723

H. Riehl, L. Cruz, M. Mata and C. Muster—Precipitation characteristics during the Venezuela rainy season 746

H. Tennekes and J. D. Woods—Coalescence in a weakly turbulent cloud 758

Discussion Meeting, 16 May 1973 on 'Recent research in the U.K. on the atmospheric boundary layer and air/sea interaction'—

C. J. Readings—Some aspects of the Cardington research programme 764

H. Cattle and K. J. Weston—The structure and development of the boundary layer over land 767

J. R. Milford—Measurements of convective heat fluxes using a powered glider .. 768

P. K. Taylor—Serial observations of the boundary layer over the sea—Jasin 1970 .. 771

R. T. Pollard—Wind driven mixing and deepening of the oceanic boundary layer .. 772

D. J. Carson—A model for the development of a convectively unstable boundary layer 774

Correspondence—

P. R. Brazier-Smith, S. G. Jennings and J. Latham—Increased rates of rainfall production in electrified clouds; Reply by C. B. Moore and B. Vonnegut 776

Discussion—

N. A. Streten and A. J. Troup—A synoptic climatology of satellite observed cloud vortices over the Southern Hemisphere (*Q.J.*, **99**, pp. 56-72) 787

Proceedings at Meetings of the Society 789

Reviews—

Pollution in the air, R. S. Scorer (F.P.); *Environment and plant life*, S. A. Searle (R.A.S.R.); *Atmospheric energetics*, J. van Miegham (R.H.); *Radar observation of the atmosphere*, L. J. Battan (K.A.B.); *Solar-terrestrial physics*, S-I Akasofu and S. Chapman (R.H.); *Meteorology of the Southern Hemisphere: Meteorological Monograph, Vol.*13, *No.* 35, C. W. Newton (Ed.) (H.H.L.) 792
